

ITVT AI Experience Center

A Hands-On Experience of AI Applications in our Onsite Workshop

Is AI an exciting topic for you but (still) too abstract for your everyday life? With our workshop, the ITVT AI Experience Center, we want to change that for you.

In just one day, you will learn what is behind applications such as Copilot and Business Apps and how you can use them - by trying them out directly on site. In cooperation with our partner Microsoft, we provide you with these possibilities and the technologies to try out for yourself.

- On the workshop day, you will be given access to Microsoft Copilot and our customized ITVT AI Sales Companion.
- Learn how to use it safely and what requirements and guidelines are needed to use artificial intelligence in a legally compliant manner.

At the end of the workshop, you will receive a summary from us with the most important steps for the implementation of AI and how you can get third parties, such as the company's own works council, on this topic.

Partner with ITVT

Fast, flexible and results-oriented - we are your speedboat for technology. Our experienced team supports you with a broad range of specialist knowledge and many years of expertise so that you can successfully embark on your AI journey.

Are you ready for the next step? We would be happy to advise you. Book our workshop now and learn how to make AI work for you.

Limited time introductory offer for only 950 €! Or request this discount when you attend one of our roadshows!

What Can You Expect?

Use Case: Easy to Use and Integrate

ITVT AI Sales Companion can be implemented directly in your CRM system. We use examples to show you how this works.

Demo: Reporting

Get all information about your customers in real time, such as visit reports and status reports. Try it out for yourself in our demo environment.

Demo: Translation

When you speak, the co-pilot writes a summary and translates it into any desired language. Test it yourself on site.

Use Case: Dictating Visit Reports

Copilot automatically generates structured and detailed reports from your dictation and brings them directly into the CRM! We'll show you how it works.
